Lab 1 - Tutorial: Create a .NET console application using Visual Studio

Please use the following Microsoft Documentation tutorial
(https://learn.microsoft.com/en-us/dotnet/core/tutorials/with-visual-studio?pivots=dotnet-6-0) and the additional
steps below to set up your visual studio environment.

Milestone 1: Hello World

1. Visit the link above.
2. Complete the "Prerequisites" listed on that page to ensure you have the latest .NET framework. For this
   class, we will use .NET 6.0
   a. Note, you may also install .NET 6.0 by installing the latest Visual Studio. *Community Edition is
      perfectly fine!*
3. Open a command/terminal environment, and screenshot the result of the command:
   `dotnet --version`
   a. Be sure you have 6.0.### or 7.0.###
4. If you did not install Visual Studio, do so now! You **MUST** use visual studio for this course.
   a. Community Edition is perfectly fine; however, if you want **Visual Studio Enterprise,** please visit
      https://azureforeducation.microsoft.com/devtools
      i. Sign in using your ETSU credentials
      ii. Click on software.
      iii. Download
      iv. Install
      v. Apply Key
5. Continue with the tutorial:
   a. Create the app
   b. Run the app

   Milestone 1 Complete – Have me check this off!

Milestone 2: Enhance the App

1. Complete the *Enhance the App* section

   Milestone 2 Complete – Have me check this off!
